

Corporate Backgrounder, March 2001

J&B Diversified Associates, Inc. is a leading provider of e-business solutions in the New England region. J&B solutions enable companies of all sizes to cost-effectively change the technology, structure, processes and culture of their organization. These solutions include network design and management, systems integration, web design and hosting, and telephone communication systems. The company was founded in 1991 and remains a profitable, privately held corporation.

Business Summary

J&B Diversified Associates was founded in January 1991 by business and technical leaders from the field of data network development. The company's experience in telecom, datacom, network management and convergence architectures comes from successful lead positions at Summa Four (now part of Cisco Systems). J&B's market-driven team consists of engineering, marketing and operations experts.

J&B specializes in the design, integration, installation, and maintenance of local area networks (LAN), wide area networks (WAN), digital key telephones, digital voice/data hybrid, voice mail, and PBX systems.

J&B's objective has always been about providing customers with state-of-the-art network and telephone equipment at competitive prices while offering superior service and maintenance.

J&B is also a full-service provider of internet connectivity, web design, web hosting, and systems integration.

Key Technologies

Information technology (IT) outsourcing is the transfer of components or large segments of an organization's internal IT infrastructure, staff, processes or applications to an external resource provider. Outsourcing encompasses the most rudimentary to the most sophisticated IT infrastructure, processes or applications.

Managing these things internally can be a great source of frustration. Our mission is to take the frustration out of IT! We implement technologies that enable companies of all sizes to cost-effectively change the technology, structure, processes and culture of their organization. We are constantly in search of new technology that will keep our clients on the cutting edge.
